Topics and target group

Forum Health Industry has been the key networking event in Baden-Württemberg for many years. It is an impulse-giver for synergies in biotechnology, medical technology, pharmaceutical industry, diagnostics and research. The main emphasis of this unique, interdisciplinary meeting lies on building and strengthening a cross-sector network in Baden-Württemberg.

Biologization in the pharmaceutical industry and medical technology is an innovation driver and, thus, encourages collaborations between research institutions and companies in the field of biotechnology. At the same time, the Corona pandemic currently drives digitalization in healthcare. This year's Forum Health Industry is all about change. Representatives from industry, research and development will come together to present and discuss current and forward-looking projects in the theme of digital and biological transformation of the healthcare sector.

Forum Health Industry 2021 addresses all parties with an interest in biotechnology, medical technology, pharmaceutical industry and diagnostics including companies, research institutions, universities and clusters.

The conference program offers keynotes on trending topics, presentation sessions on exciting R&D projects as well as panel discussions and interviews.

The Forum Health Industry 2021 is supported by the regional partner FWTM – Freiburg Wirtschaft Touristik und Messe GmbH & Co. KG

What you can expect

- Keynotes on trending topics
- Presentation sessions on exciting R&D projects
- Panel discussions
- Interviews
- Networking opportunities
- etc.

A visionary keynote and a panel discussion will provide exciting insights into the transformation of the healthcare industry. In the afternoon, two sessions - "Inspired by nature – the biological transformation in the healthcare industry" and "Initiating innovations – but doing it right!" - will deepen this topic.

Programme details will be published soon.

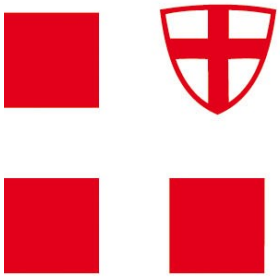

Your participation

At the moment, it is only possible to pre-register for our event. Available seats in Freiburg will preferentially be assigned to pre-registered participants. The final registration will be available soon.
