To the registration

How would you address the key challenges in your region´s health and care system? Which focus would be most important to make the system more innovative and future-ready?

These questions are key questions are addressed by the workshop "Future Health, Shared Solutions: From Challenges to Change", which focuses on three key areas:

- Advancing green and e-hospitals,
- Improving system-level service provision,
- Boosting customized technology transfer.

Together with like-minded stakeholders from a transnational and transsectoral network you will translate your ideas into concrete solutions that address the actual needs of the health and care system.

Why participate:

- You will work together with an interdisciplinary team of experts from practice, research and administration to develop tailor-made solutions for your region.
- You will benefit from proven methods and results from the HACK-IT-NET project, which you can adapt directly to your challenge.
- You will expand your transnational network and make new contacts in the health and care sector.
- By participating, you can contribute your perspective and help shape the prioritisation of key topics within the project.

The workshop will take place on the **1st of December 2025 from 9:30 a.m. to 12:30 p.m.** and on the **2nd of December 2025 from 1:00 p.m. to 04:00 p.m.**

It is possible to participate on one or both days. Registration for the event is open until Friday, November 28th.

Challenges

After registering, you will receive the challenges in advance by email and can decide which challenge you would like to take part in.

Programme

In the workshop, you will join a team working on a topic of your choice and work together to develop solutions for a specific challenge.

Day 1 | Problem definition

>> You will focus on a clear, specific challenge within your chosen topic.

Day 1 & Day 2 | Finding solutions

>> You will develop and iterate your solutions in a small, interdisciplinary team.

Day 2 | Selection and presentation

>> You will refine and present the leading concepts and work together to identify the strongest solutions.

The workshop is part of the Interreg project HACK-IT-NET. HACK-IT-NET aims to strengthen innovation and knowledge transfer in the health and care system – always with the overarching goal of improving health and care conditions throughout the Alpine region. The Interreg project HACK-IT-NET is co-financed by the European Union.
