Workshop description

Croatian Wood Cluster invites you to the workshop Challenges and Opportunities of Eco-construction in Southeast Europe in the name of the partners of the EU-project DanuBioValNet.

The event will bring together interested companies (SMEs), clusters managers, business support organisations, experts and architects from academia of the Danube region. The workshop aims to answer some of the questions arising because of high potential for the intense development of the eco-construction in the Danube region:

- What could be the role of the architects and designers?
- How to implement more bio-based materials in the construction projects?
- Why is eco-construction important for further development of tourism?
- How can eco-construction support transformation towards bioeconomy?
- What is the importance of innovations in the eco-construction projects?

The agenda is attached above. Please registered via e-mail projekti@drvniklaster.hr
