The Life Science job fair CONTACT

The **CONTACT** is the centerpiece of our association **BioContact e.V.**
Since 2001 we foster direct contact between visitors of the CONTACT job fair and company representatives of major players and startups of the **pharmacy, consulting and biotechnology industry**.

The **CONTACT** is addressed to Life Scientists and professionals in the field of biology, chemistry, physics, medicine, pharmaceutics and many other areas of life sciences.

You can expect a **wide range of talks**, where you get direct information about **job perspectives** within the respective company.

External speakers tell you about possible jobs in the areas of life sciences, publishing and forensics. Furthermore, we offer several **workshops** of renowned companies where you get the chance for a **resume check** and **interview trainings**. This will gear you up for every application process you might face in the future.
