Workshop description

Business Upper Austria Cleantech Cluster invites you to the pilot action Eco Construction, in the name of the partners of DanuBioValNet project. The workshop will bring together interested companies, cluster members from project partner countries, cluster managers, business support organisations and experts. The objective is to facilitate cross-border and cross-regional cooperation of clusters and SMEs for creation of a bio-based value chain. The workshop will help to create interesting project ideas/initiatives and a macro regional network.

The first day (13th March 09:00 - 18:00) will give you an overview of best practice examples from Austria for Eco Construction with interesting key note speakers, followed by a workshop for wood construction in urban areas as well as recycling oriented dismantling with a special focus on reuse. The day will finish with a guided tour with focus on architecture at the Paneum Asten near Linz (bus transfer provided).

On the second day (14th March 09:30 - 13:00) you will have the opportunity to attend the Messe Wels HANDWERK 2019 trade fair for craftsmanship and site visits of two more buildings on the way to Wels (bus transfer provided).

By the end of the event you will have:

- Presented your company and exchanged expertise
- Established contacts with leading actors of the Eco Construction Sector
- Identified new business opportunities and found partners for your future project
- Become part of new bio-based innovative ideas

The agenda and registration link are listed above.
