

BoB – Best of Biotech

Type:	Competition
Submission deadline:	13-Jun-2025
Funded by:	Austria Wirtschaftsservice (aws)
Reach:	worldwide

Compete for the Best Business Ideas in Biotech & Medtech!

aws BoB is a prestigious international competition in life sciences, designed to transform groundbreaking ideas into successful innovations. In 2025, BoB will celebrate its 11th round in a special 25th anniversary edition!

Organized by aws Life Science Austria (LISA), a program of Austria Wirtschaftsservice Gesellschaft mbH (aws), on behalf of the Federal Ministry of Labour and Economy (BMAW), BoB offers a unique platform for aspiring entrepreneurs.

Participants will receive valuable feedback on their business ideas from experts with extensive knowledge in life sciences, patents, finance, and entrepreneurship. Finalists in each category will benefit from individual coaching to prepare for their final pitch in front of our top-class jury.

BoB also provides participants with high visibility within the life science community and valuable networking opportunities. All participants are invited to attend the exclusive awards ceremony in Vienna.

BoB is open to students, researchers, and teams or individuals from around the world who aim to turn their ideas into businesses, as well as young start-ups up to 3 years old (founded after March 31, 2022).
